

A leading West Coast manufacturers representative of process measurement and control equipment. Have a specific application in mind? Contact us at 800.478.1002 or email info@jprsystems.com

 YOKOGAWA Field Instruments & Analyzers	  Heat Tracing Systems	 <small>The Safety Company</small>   <small>General Monitors by MSA</small> Gas & Flame Detection Process Oxygen Analyzers	 Gas & Liquid Analyzers
 Process Weighing Systems <i>-Authorized Service Provider-</i>	 Service Solutions Calibration & Start-Up	 PROTECTOSEAL. Vapor & Flame Control	 Thermal Mass Flowmeters
 Strainers & Filtration	 Level Measurement	 Valmet <small>FORWARD</small> Real-Time Total Solids Measurement	 Ultrasonic Flow Meters
 Precision Pressure Gauges & Calibrators	 Solids Measurement Solutions	 Waltron Experts in Water Chemistry	 Monitoring & Displays
 Turbine Flow Meters	 <small>Alloy Valves and Control</small> Valves, Automation & Primary Flow Elements	 JCT GROUP Gas & Liquid Sampling & Air Quality Monitoring	 REOTEMP <small>INSTRUMENTS</small> Temperature & Pressure Measurement

***Services to Optimize Processes
and Maximize Results***

Instrument Calibration

- Traceable calibration and reference equipment allows performance verification and calibration at your site
- Traceable calibration of any measurement instrumentation
- Comprehensive calibration certificate with conformity statement
- All brands of instrumentation

Field Start-Up & Commissioning

- Experienced service engineers to support on-site commissioning process and set-up of field instruments. JPR Service will get your processes up and running, on time and within your budget.

Site Audits

- JPR Service offers a preventative maintenance service which includes a site audit of your process instrumentation, along with recommended preventative maintenance and calibration schedules, to keep your plant in compliance and help minimize unplanned outages.

On-Site Troubleshooting

- Experienced service engineers will diagnose your instrumentation and determine the best course of action. Some repairs may be performed on-site or JPR Service can facilitate returns to manufacturer for repair. We can also advise if issues are application related.

Training

- On-site training for technicians in instrumentation start-up, troubleshooting, calibration and verification.
