FOR IMMEDIATE RELEASE

“JPR Systems to Represent Waltron Water Analyzer Instrumentation”

Expanded product portfolio offers customers quality solutions for water quality applications

November 1, 2023 - Brea, California -- JPR Systems, a leading manufacturer's representative of process measurement equipment, is proud to announce they have partnered with Waltron to represent their line of high-quality water analyzers to customers in California and Nevada.

With over 120 years of quality and innovation leadership, Waltron offers the most technologically advanced solutions in online analytical instrumentation. Waltron's modern water analyzers are designed with easy touchscreen operation, simple maintenance and lay-up procedures, durable and reliable engineering, and are perfect for variable/cycling operations. With an industry-leading lifetime cost of ownership, Waltron's solutions are sure to meet the needs of any customer.

Geoff Wickens, Sales Manager for JPR Systems, expressed his enthusiasm and stated "We are thrilled to work alongside Waltron. Their unwavering commitment to quality and innovation is second to none, and we are confident that our partnership will be a success. We look forward to delivering top-tier solutions to our valued customers."

Jon Guy, President and CEO of Waltron Bull & Roberts, LLC shared his excitement about the representation, saying "We are pleased to partner with JPR Systems to expand our support for our innovative solutions in California and Nevada. We are confident that JPR Systems' expertise and dedication to customer service will help us better serve this region."
